Job Market Paper

Committed to Education: School Fees, Vouchers, and the Timing of Cash Transfers
with Gonzalo Ferres Available here.

Abstract. Primary-school dropout remains widespread in Sub-Saharan Africa, and school fees are seen as a major barrier to completion. In an experiment with 2,000 parents and children in Uganda, we study whether time inconsistency contributes to unpaid school fees and lower school participation. We introduce three transfers of equal monetary value: (1) cash six weeks before fees are due, (2) cash when fees are due, and (3) a voucher paid directly to the school. We first elicit parents' willingness to pay for two restrictions on the transfer: delaying cash until fees are due and earmarking it for school fees, holding timing fixed. Demand for both restrictions is substantial: average willingness to pay is 24% of the transfer value for delay and 35% for earmarking. We then randomize parents to one of the three transfers or a control group. The voucher more than doubles fees paid, increases school attendance, and cuts within-term dropout by more than half. Cash has smaller effects on all three outcomes, with no additional effect from delaying cash. The vouchers effects on fee payment and attendance are largest among parents with low willingness to pay for it, in part because they underestimate how much it will raise their fee payment relative to cash. These findings are consistent with partial naïveté, in which parents anticipate their own time inconsistency but underestimate its severity. Paying schools directly can therefore help parents follow through on plans to invest in their children's education.

Working Papers

Impacts of Secondary School in Kenya after Two Decades
with Edward Miguel, Owen Ozier, and Michael Walker Available here.

Abstract. This paper studies the long-run effects of access to secondary school in Kenya – where admission depended on a cutoff score on a national exam – using a regression discontinuity design and a panel dataset that follows individuals for nearly two decades after the exam. Scoring above the cutoff raises secondary school completion by 18 percentage points, with similar increases for women and men. Greater access to secondary schooling leads to substantial improvements in cognition, with gains of 0.20.3 standard deviations into midlife. Realized fertility also declines substantially and persistently among men (by about 0.8 children on average) but, perhaps surprisingly, not for women. There is suggestive evidence that benefits may extend to the next generation, as the children of female respondents who scored above the exam cutoff perform better on tests of academic skills.

Grants and Fellowships

2026

Giannini Foundation of Agricultural Economics	$35,000
Rocca Dissertation Fellowship, UC Berkeley Center for African Studies	$11,000
John L. Simpson ABD Fellowship, UC Berkeley	$1,000

2025

Development Challenge Awards, Center for Effective Global Action (two awards)	$12,150; $12,000

2024

Learning for All, Abdul Latif Jameel Poverty Action Lab (J-PAL)	$60,768
The Weiss Fund, University of Chicago	$39,498
CEDA Pilot Grant, Center on the Economics and Demography of Aging	$28,400
Development Challenge Award, Center for Effective Global Action	$15,000
John L. Simpson ABD Fellowship, UC Berkeley	$10,000

2023

Gender Economics Research Award, UC Berkeley Economics	$9,000

Teaching

University of California, Berkeley

Business and Production of Beer, Wine, and Spirits	2021–23, 2025–26
Population, Environment, and Development	2024
Case Studies in Economic Development	2023

Research Assistance

University of California, Berkeley

Graduate Research Assistant to Edward Miguel	present
Undergraduate Research Assistant to David Card	2014–2015

Partners In Health

Pro-Bono Researcher	2016–2020

Professional Experience

Senior Research Associate, Center for Effective Global Action, UC Berkeley 2019–2021

Senior Analyst, Analysis Group, San Francisco 2016–2019

Presentations

UC Berkeley: Development Lunch (2024–2026, multiple presentations), Development Workshop (2023–2026, multiple presentations), Development Department Seminar (2026), Labor Department Seminar (2026), Agricultural and Resource Economics Department Seminar (2026)

Other: CEGA Research Retreat (2026), Economic Science Association (2026), CEGA Evidence Action Summit (2024), Population Association of America (2024), CEGA Working Group in African Political Economy (2023), CEDA Aging in Africa (2022)
